

NAFISA NASRIN

Software Engineering Student | Aspiring Full-Stack Developer

nafisanasrin28@gmail.com | 01709090365 | github.com/nafisa009 | linkedin.com/in/nafisa-nasrin-1872ba341

PROFILE

Motivated Software Engineering student with hands-on experience across web development, problem solving, and applied capstone projects. Comfortable working across the stack with HTML, CSS, JavaScript, React and Python, with a strong foundation in Data Structures and Algorithms. Passionate about building practical, user-focused software and solving real-world problems through code.

EDUCATION

BSc in Software Engineering

Daffodil International University | 2024 – Ongoing

SKILLS

Languages	HTML, CSS, JavaScript, Python, C, Java
Frameworks / Libraries	React, Node.js
Core CS	Data Structures, Algorithms
Design Tools	Adobe Photoshop

PROJECTS

CampusNova — Capstone Project

Smart campus management platform

Designed and developed a centralized platform to streamline campus activities, improving access to academic resources and campus services for students.

Women Safety App — Capstone Project

Personal safety mobile/web application

Built a safety-focused application enabling quick emergency alerts and location sharing, aimed at improving personal safety and response time in emergencies.

Chess Project

Interactive web-based chess game

Implemented core chess game logic and an interactive board interface using JavaScript, focusing on game rules, move validation, and UI interactivity.

Study Helper Website

Productivity tool for students

Created a web application to help students organize study material and manage study sessions more effectively.
